

GEMINI HACKATHON · TOKYO

Mimi 耳

Learn Japanese from real conversations: live translation now, plus a study coach that turns the audio into flashcards for later.

- EXPO MOBILE
- GEMINI LIVE
- STUDY COACH

THE STAKES

You have to improve your Japanese

- Or you **lose job prospects**
- You **miss real connections** with people around you
- You might eventually have to **go home**

The pressure is real. The learning has to fit real life.

PROBLEM

Translation tools help you understand, not remember

- The best vocab is **personal**: from your calls, dinners, live moments
- Import tools (LingQ, Migaku) need content you **prepared ahead of time**
- Tutor call, friends speaking JP, real world: **no transcript, nothing sticks**

SOLUTION

Machine intelligence for live audio

- Phone mic → Gemini Live → **bilingual subtitles** in real time
- A study coach reviews the **original audio** after the conversation
- It cleans up the deck using mistakes, hesitation, and words you already know

ROADMAP

From live help to an agentic study pipeline

- **Today:** listen, translate, tap words, capture flashcards
- **Next:** post-session coach analyzes audio and fixes the deck
- **Later:** dictionary, web, and Anki tools loop until the study plan is right
